INDEX

TO THE

PUBLICATION

OF THE

LONDON:

PRINTED BY WILLIAMS AND STRAHAN,

7 LAWRENCE LANE, CHEAPSIDE.

INTRODUCTION.

At the last Annual General Meeting, January 19th, 1881, Mr. Symons, the President, selected as the subject of his Address "The History of the English Meteorological Societies from 1823 to 1880." The Council considered that the value of this History would be greatly enhanced if it were supplemented by an Index of all the Papers which have appeared in the various periodical publications, which have from time to time appeared under the auspices of the several Societies. Such an Index has accordingly been prepared, and it is now issued so as to allow of its being bound up with the volume containing Mr. Symons's Address.

The Index contains the titles of all the Papers appearing in the following publications, with the abbreviations by which the different publications are indicated:—

1. Transactions of the Meteorological Society. Instituted in the year 1823. Vol. I. 1839. Abbreviation *Trans.*
2. The Quarterly Journal of Meteorology and Physical Science. Published under the immediate sanction and direction of the Meteorological Society of Great Britain. From January 1842 to October 1843. Edited by J. W. G. Gutch, M.R.C.S. 1843. Abbreviation *Gutch.*
3. Reports of the Council of the British Meteorological Society, 1851 to 1861. Abbreviation *Rep.*
4. Proceedings of the Meteorological Society. Edited by James Glaisher, F.R.S. Vols. I.-V. 1862-71. Abbreviation *Proc.*
5. Quarterly Journal of the Meteorological Society. Edited by a Committee of the Council. Vols. I.-VII. 1873-81. Abbreviation *Q. J.*

INDEX

OF

PUBLICATIONS OF THE

METEOROLOGICAL SOCIETY.

- Abbott, F.** On a Luminous Meteor observed at Hobart Town. *Proc.* II. 275.
 ——— On the Aurora Australis of 8th June, 1864. *Proc.* II. 274.
- Abercromby, Hon. R.** An Improvement in Aneroid Barometers. *Q. J.* III. 87.
 ——— On certain Small Oscillations of the Barometer. *Q. J.* II. 435.
 ——— On a Method of sometimes determining the Amount of the Diurnal Variation of the Barometer on any particular day. *Q. J.* IV. 198.
 ——— On the application of Harmonic Analysis to the reduction of Meteorological Observations, and on the general Methods of Meteorology. *Q. J.* IV. 141.
 ——— On the Barometric Fluctuations in Squalls and Thunderstorms. *Q. J.* II. 450.
 ——— On the general character and principal sources of variation in the Weather at any part of a Cyclone or Anti-cyclone. *Q. J.* IV. 1.
 ——— On the Heat and Damp which accompany Cyclones. *Q. J.* II. 274.
 ——— Visibility. *Q. J.* III. 294.
- Aberdeen,** *see* Innes.
- Ackland, W.** On an Improved Method of dividing Alcohol and other Thermometers. *Proc.* IV. 23.
- Adams, C. H.** An Account of the Annual Fall of Rain at Edmonton for the past 26 years. *Gutch* I. 95.
- Addison, W.** Maximum, Minimum, and Mean Temperature, Pressure, and Dew-point for each month in 1837, in Great Malvern, Worcestershire. *Trans.* I. 124.
- Adelaide,** *see* Todd.
- Aden,** *see* Russell.
- Adie, Mr.** Description of a Portable Anemometer of Moderate Cost. *Proc.* II. 159.
- Adie, R.** On the Mean Annual Temperature of Western Europe, compared with other Climes. *Proc.* I. 303.
- Aerostation,** *see* Green.
- Africa, East,** *see* Kirk and Robb.
- Africa, South,** *see* Bennett, Boulton, Gamble, Mann, and Marks.
- Africa, West,** *see* Bourke and Turton.

Agricultural and Forest Meteorology, Resolutions adopted by the (Vienna) Conference for the Development of. *Q. J.* VII. 117.

Agricultural Meteorology, *see* Moffat.

Airy, G. B., F.R.S. Note on the Theory of Vapour-pressure. *Proc.* I. 365.

— On the Determination of Heights from Barometer readings. *Proc.* III. 406.

Alten. Summary of Observations made at Kaafjord Meteorological Observatory, West Finmark, Norway. *Gutch* I. 422.

Alost, *see* Staercke.

Anemometer, *see* Adie, Browning, Casella, Cator, Curtis, Forbes, Hagemann, Hall, Howlett, Lowne, Osler, Scott, Stow, and Watson.

Aneroid, *see* Abercromby, Field, Negretti and Zambra, Simmonds, Symons, Walker, and Whipple.

Anthelia, *see* Maverly.

Arbroath, *see* Brown.

Arched Squalls, *see* Schück.

Archibald, E. D. Variations in the Barometric Weight of the Lower Atmospheric Strata in India. *Q. J.* VI. 169.

Aspiration of Thermometers, *see* Miller.

Atacama, *see* Bollaert.

Athens, *see* Raulin.

Atkinson, J. On the Effect of Light upon Ozone paper. *Proc.* I. 307.

— Results of some Experiments on Situation, Shape, and Size of Rain Gauges. 1840-1-2. *Gutch* I. 243, 305.

Atlantic, *see* Birt, Gaster, Harding, Reinsch, Toynbee, and Watson.

Atmometer, *see* Miller and Prestel.

Atmospheric Electricity, *see* Morrison.

Atmospheric Pressure, *see* Bloxam, Cann-Lippincott, Chambers, Erman, Glaisher, Goddard, Mann, and Strachan.

Atmospileometer, *see* Hall.

Aurora, *see* Abbott, Barber, Blake, Chimmo, Corporants, Denning, Denza, Dixon, Fisher, Glaisher, Herschel, Lees, Linslade, Lowe, Nash, Pratt, Smith, Trevenen, and Wood.

Aurora of February 1, 1870 ; reports by the Astronomer Royal, G. S. Criswick, W. Ellis, W. Marriott, W. C. Nash, G. L. Schultz, H. Wortham, and T. Wright. *Proc.* V. 68-74.

Aurora of February 11, 1870 ; reports by O. Airy, R. C. Cann-Lippincott, and G. L. Schultz. *Proc.* V. 77-78.

Aurora of February 12, 1870, appearing in daylight. *Proc.* V. 78.

Aurora of February 17, 1870. *Proc.* V. 81.

Aurora of February 19, 1870. *Proc.* V. 82.

Aurora of February 23, 1870. *Proc.* V. 82.

Aurora of September 24, 1870 ; reports by Prof. F. Denza and B. W. Smith. *Proc.* V. 216-219.

Aurora of October 24, 1870 ; reports by W. Barber, W. Bishop, W. Marriott, W. C. Nash, G. L. Schultz, and T. Wright. *Proc.* V. 221-228.

Aurora of October 25 and 26, 1870 ; reports by W. Bishop, W. Marriott, W. C. Nash, G. L. Schultz, and T. Wright. *Proc.* V. 229-236.

Aurora Australis, *see* Abbott and Mann.

Austen, Lieut.-Col. H. Meteorological Notes on Jersey. *Proc.* III. 392.

— On calling Strong Winds Cyclones which are not Cyclones. *Proc.* II. 450.

Austen, Lieut.-Col. H. The Anemometric Records of the Greenwich and New Observatories epitomised and collected. *Proc.* III. 424.

——— The Antagonism of the Polar and Equatorial Air-currents, exemplified illustratively by the unseasonable Storm in Western Europe of the 18th and 19th of May, 1863. *Proc.* I. 376.

——— The Terrific Gale of December 2, 1863. Was it a direct Gale, or a Cyclonic (Circular) Storm? *Proc.* II. 167.

Bailey, H. W. Atmospheric Diseases at Thetford, Norfolk. *Trans.* I. 119.

——— Meteorological Medical Report for the first six months of the year 1842. *Gutch* I. 278.

——— Meteorological Summary at Thetford, Norfolk, 1837. *Trans.* I. 118.

——— Synopsis of Meteorological Observations for the year 1841, accompanied with an account of the various diseases occurring at Thetford, Norfolk. *Gutch* I. 24, 85.

Balloon Ascents, Report on. *Proc.* III. 223.

Bangalore, *see* Kingsford.

Bangkok, *see* Campbell.

Banner, Capt. F. W. Extract of log from Barque 'Lady of the Lake.' *Q. J.* I. 157.

Barbadoes, Report from. *Proc.* V. 360.

Barber, Rev. S. Electric Cumulus. *Q. J.* I. 38.

——— On the Auroral or Magnetic Cirrus. *Q. J.* IV. 191.

Barker, Dr. T. H. Remarks on the Relative Value of the Ozonometers of Drs. Schönbein and Moffat, based upon daily observations at Bedford from December 1, 1854, to September 1, 1856. *Rep.* 1856, 29.

Barograph, *see* Redier and Russell.

Barometer, *see* Abercromby, Airy, Bogen, Casella, Coathupe, Eaton, Ellis, George, Hicks, Hill, Howson, Jelinek, Kopp, Laughton, Leach, Marriott, M'Farlane, Morrison, Negretti and Zambra, Power, Previté, Rikatcheff, Ross, Rundell, Strachan, Whipple, White, and Woods.

Barometer Readings, Relative Frequency of, *see* Whipple.

Barometric Changes, Rate of, *see* Whipple.

Barometric Depression, *see* Gaster, Ley, and Marriott.

Barometric Gradients, *see* Ley.

Barometric Height at London, *see* Eaton and Whipple.

Barometric Weight of the Lower Atmospheric Strata, *see* Archibald.

Bath, *see* Lockey.

Baudin's Minimum Thermometer, *see* Negretti.

Beardmore, N. Presidential Address. *Proc.* I. 1.

Beazeley, A. On some Swedish Meteorological Observations in connection with the Return of the Seasons. *Q. J.* VII. 246.

Bedford, *see* Barker.

Bellingham, W. On the Periodic Return of a Tide of Vapour. *Proc.* I. 110.

Bennett, G. W. On an Aerolite seen at the Cape. *Proc.* IV. 74.

Bianconi, Prof. G. G. On Meteorites. *Proc.* II. 22.

Bidston Observatory, Report from the. *Proc.* III. 437; IV. 211; IV. 414; V. 357.

Birds, *see* Cordeaux.

Birmingham, *see* Smith.

Birmingham, Midland Institute, Report from the. *Proc.* III. 219, 438; *Q. J.* II. 88.

- Birt, W. R.** On a Peculiarity in a Cyclone. *Proc.* II. 398.
 ——— Remarks on the Atlantic Hurricane of August 20th to 24th, 1873. *Q. J.* II. 147.
- Distribution of Rainfall Maxima in Great Britain and Ireland between the years 1848 and 1872 inclusive. *Q. J.* I. 266.
- Black, W. T.** Observations of Rainfall at Sea. *Q. J.* IV. 164.
- Blake, H. W.** Cirri-clouds and Aurora. *Proc.* I. 331.
- Blanford, H. F., F.R.S.** Note on the Hailstorm of the 24th March, 1865. *Proc.* II. 456.
 ——— On the Great Storm which occurred at the commencement of October, 1864, in India. *Proc.* II. 453.
- Bloxam, J. C.** Analysis of the Winds. *Proc.* III. 140.
 ——— Atmospheric Pressure and Rainfall. *Q. J.* II. 277.
 ——— Computation of the Dew-point from the readings of Wet and Dry Thermometers. *Proc.* II. 155.
 ——— On Difference of Winter Temperatures of Greenwich and Newport. *Proc.* II. 455.
 ——— On Temperature at different Heights. *Proc.* III. 402.
 ——— On the Correlation of the Daily Values for Atmospheric Pressure, as calculated respectively for Newport and for Greenwich. *Proc.* I. 138.
 ——— On the Diurnal Variation of Terrestrial Magnetism. *Proc.* III. 415.
 ——— On the Influence of the Moon upon the amount of Rainfall. *Proc.* V. 55, 269.
 ——— On the Pressure and Diffusion of Elastic Fluids. *Proc.* II. 371.
 ——— On the Reduction of an Irregularly Progressing Series of the Regularly Succeeding Values of a specific term to Constant Average and Regularly Progressing Values. *Proc.* I. 143.
 ——— On the Theory of Vapour-pressure. *Proc.* I. 362.
 ——— On the Winter which occurs in the Spring of the Year; and the Summer which occurs in the Fall of the Year. *Proc.* I. 321.
 ——— Table of the Daily amount of Ozone at Newport and Staplers. *Rep.* 1857, 44.
 ——— Temperature at Greenwich and at Newport. *Proc.* III. 8.
 ——— Terrestrial Magnetism. *Proc.* III. 317.
 ——— Vapour-pressure and Vapour-action. *Proc.* II. 41.
- Blythe, H. E.** Results deduced from 30 years' observations (1840-69) at Burnham, Westgate, Norfolk. *Proc.* V. 83.
- Bogen, F.** On a Standard Cistern Siphon Barometer. *Q. J.* V. 137.
- Bogen's Barometer,** *see* Marriott and Whipple.
- Books and Notices.** *Proc.* I. 65, 116, 266, 310, 318, 341; II. 30, 173, 282, 316, 400.
- Bollaert, W.** History of the Meteoric Iron of Atacama. *Rep.* 1858, 27.
- Bombay Presidency,** *see* Chambers.
- Bossekop,** *see* Bravais.
- Boulton, Lieut.** Notes on the Climate of the South-west Coast of Africa. *Q. J.* I. 97.
- Bourdon's Metallic Barometer,** *see* Hill.
- Bournemouth Meteorological Society,** Report from the. *Proc.* V. 349.
- Bourne, Com. E. G.** New Form of Solar Thermometer. *Q. J.* III. 365.
 ——— Notes on the Meteorology and Physical Geography of the West Coast of Africa, from Cape Verd to the Cape of Good Hope. *Q. J.* IV. 25.
- Bowkett, W. D.** A New Thermograph. *Q. J.* VI. 214.
- Boys, Rev. H. A.** On the Climate of Patras, Greece. *Q. J.* II. 139, 376.

Boys, Rev. H. A. Results of Meteorological Observations made at Patras, Greece, during 1874 and 1875. *Q. J.* III. 373.
